

EasyTeleMed
PROFESSIONAL

THE APP FOR PROFESSIONALS AND HEALTHCARE FACILITIES

EasyTeleMed Professional is the **CE-certified mobile application of EasyTeleMed** (class II/A medical device according to EU MDR 2017/745) to **manage of multiple patients** (acquire vital parameters, compile clinical diary, perform examinations and automatically send to the electronic medical record) by healthcare professionals **through a single device** during planned home visits or in healthcare facilities.

EasyTeleMed Professional is designed for an **expert user**. It guides the operator during the measurements to acquire according to the personalized care plan: select the patient from the list and follow the

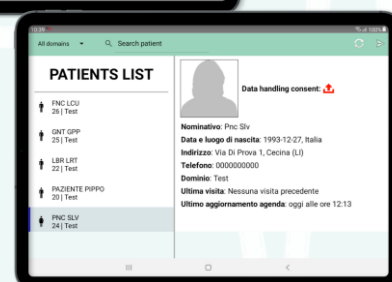

instructions on the screen to properly complete the task. It is also possible to perform “extra” activities, not included in the patient care plan.

Acquisition of vital parameters is performed via **Bluetooth biomedical sensors** and is automatic, eliminating errors due to manual transcription (manual entry is however guaranteed). Transmission of collected data to the cloud is also automatic.

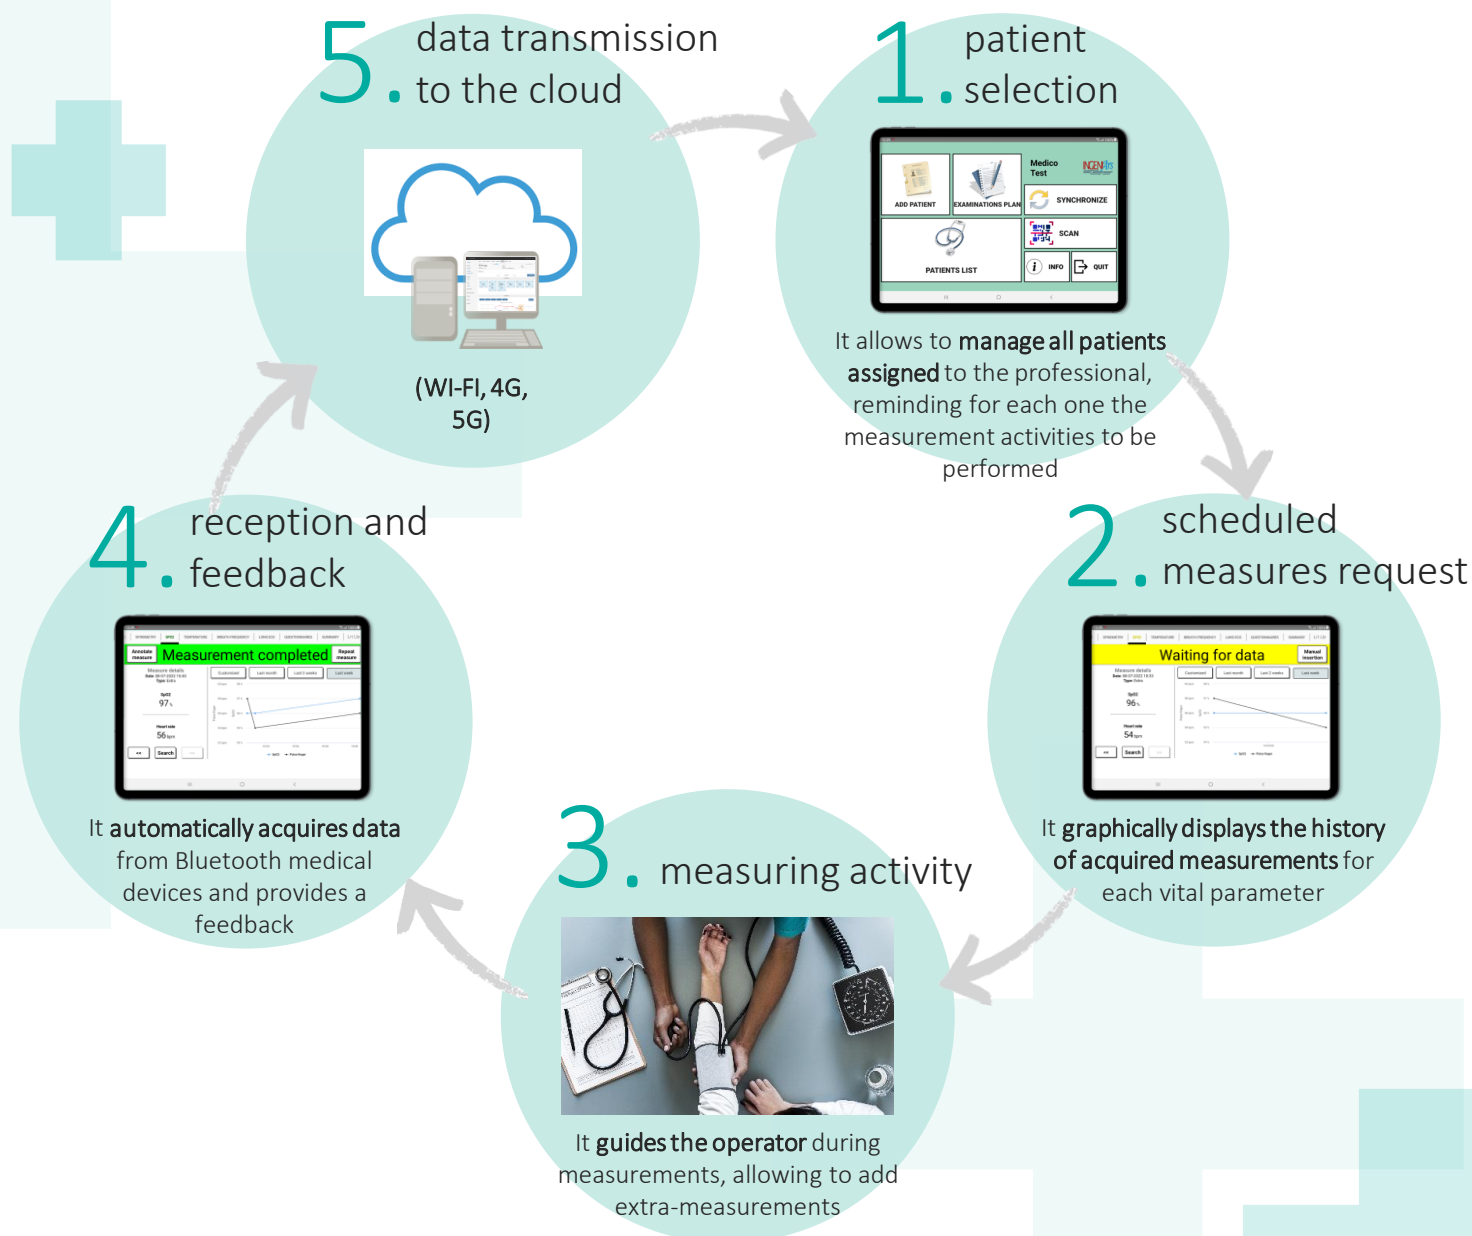

EasyTeleMed Professional is available as a stand-alone version (mobile application) and as a kit version, consisting of a tablet with the application installed and a set of Bluetooth medical sensors.

KEY FEATURES

- ✓ Simple and intuitive graphical user interface to guide the operator through the measurement acquisition
- ✓ Multi-patient and multi-operator solution
- ✓ Large number of Bluetooth biomedical sensors integrated
- ✓ Any Bluetooth sensor can be integrated
- ✓ Acquisition and storage of scheduled and extra-agenda measurements from the supplied medical sensors
- ✓ Manual input of measurements
- ✓ Visit and access management
- ✓ Integration with any electronic medical record
- ✓ Forward of received measurements to EasyTeleMed EMR Plus or electronic medical record via secure HTTPS connection
- ✓ Possibility to view the history of the measurements acquired per patient
- ✓ Completely wireless solution, also usable on the move
- ✓ Support of evaluation questionnaires

HOW IT WORKS

MEASURABLE PARAMETERS

Possibility of integrating new vital parameters

	ELECTROCARDIOGRAM
	HEART RATE
	BLOOD PRESSURE
	GLICEMIA
	QUESTIONNAIRES
	BODY WEIGHTS
	SPO2
	BODY TEMPERATURE
	SPIROMETRY
	AUSCULTATION

AVAILABLE DEVICES

Possibility of integrating new Bluetooth sensors

ECG	GIMA PC-80B, CORSCIECE COR12
BLOOD PRESSURE	A&D UA-651BLE, A&D UA-767PBT-CI, TAIDOC TD-3128
SPO2	GIMA OXY10, MIR SPIROTEL II, NONIN 3230, TAIDOC TD-8255
GLICEMIA	ACCU-CHECK GUIDE
BODY WEIGHT	A&D UC-351PBT-CI, A&D UC-352BLE
TEMPERATURE	TAIDOC TD-1241
SPIROMETRY	MIR SPIROTEL II
AUSCULTATION	MINTTISMARHIO-D2
